

# Telescope Pipe F/F

Telescope pipe

## Description

- Trademark: Virotec®
- FM / VdS approved
- The telescope pipe is an adjustable-length drop nipple to be used in fixed fire extinguishing systems. It allows the exact adjustment of sprinkler heads (inclusive escutcheons) in the centre of the tile. The adjustment can be made after the complete installation of the pipe system.
- The adjustment of the length is done by screwing the inside pipe in or out. This is possible when the system is under pressure. The O-ring seals the gap between the two pipes.
- Working pressure: PN 25 (25 bars)
- Working temperature: -20°C to + 110 °C
- Finish coat : black painting

Reference	Description	Length (mm)		Adjustment (mm)	Connections		Weight (kg)
